

Premium Event Production for Agencies

Who Are DMS?

Dynamic Media Solutions (DMS) is a UK-based live events technical partner, supporting agencies, production teams and event professionals with reliable AV, communications and technical delivery services. Since 2009, we have worked behind the scenes on projects across the UK and Europe, providing everything from dry hire

support through to fully managed technical delivery. We understand the fast-paced nature of live events and the importance of dependable technical execution, clear communication and flexibility throughout the delivery process. Whether supporting a single meeting room or a large-scale multi-space event, our team works closely with clients, suppliers and freelance crews to ensure every project runs smoothly from planning through to live operation. With a practical, collaborative approach and a strong focus on getting the basics right, DMS aims to be a trusted extension of your team - delivering technical solutions that support both your event and your client experience.

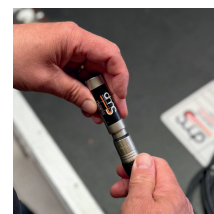

How we work with agencies

We support agencies and production teams with reliable technical delivery, flexible support and collaborative planning across live events throughout the UK and Europe.

Flexible Support

From dry hire support through to full technical delivery, we adapt our involvement around the needs of each project and production team.

Collaborative Planning

We work closely with agencies, venues and suppliers to coordinate technical and logistical requirements ahead of delivery.

Prepared in Advance

Systems are prepared, configured and tested in-house wherever possible to support efficient onsite deployment and reliable operation.

Dependable Onsite Delivery

Our team supports projects onsite with technical setup, live operation and responsive problem solving throughout delivery.

Built around Agency Workflows

We understand the fast-paced nature of agency-led productions and aim to operate as a dependable extension of your team.

Why Agencies Choose DMS

We understand the pressures of live event delivery and the importance of reliable technical support behind the scenes. Our approach is built around flexibility, communication and dependable execution.

Reliable Under Pressure

Calm, dependable technical support throughout fast-paced live environments.

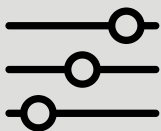

Built Around Collaboration

We work closely with agencies, suppliers and freelance crews as part of a unified delivery team.

Prepared in Advance

Systems are configured, tested and prepared ahead of deployment wherever possible.

Flexible Technical Support

From dry hire support through to full technical delivery and onsite management.

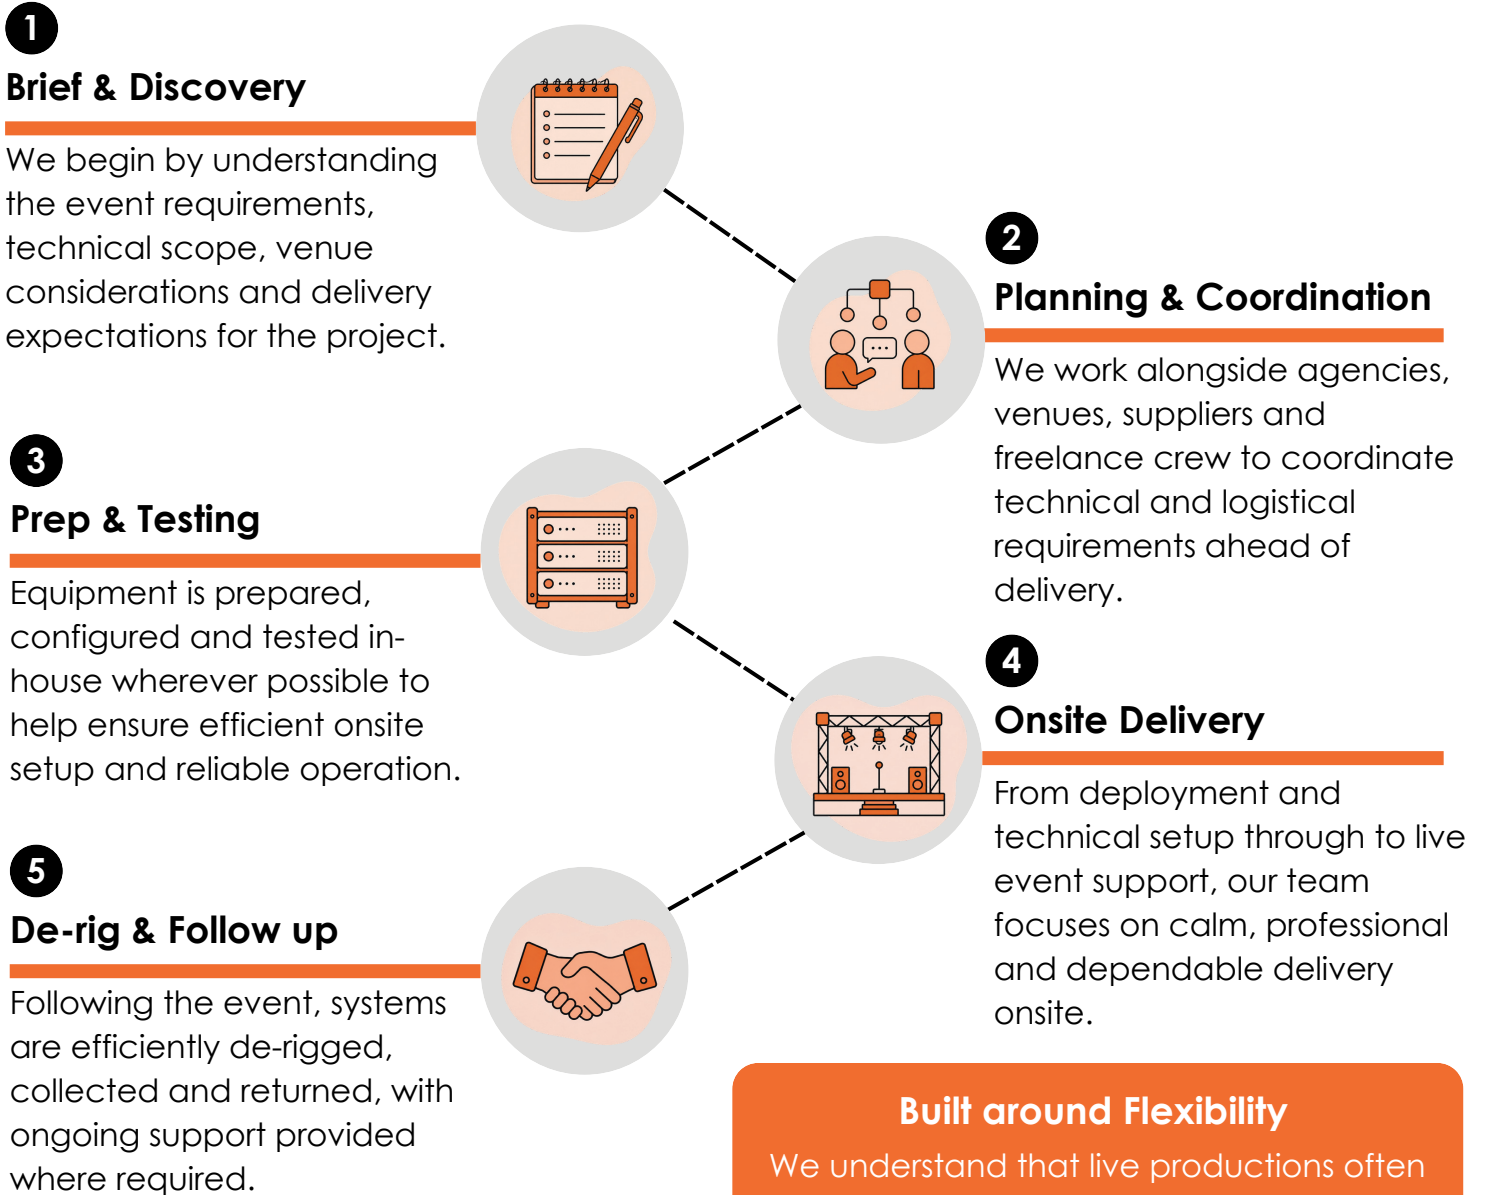

Attention to Detail

Focused on the details that help events run smoothly behind the scenes.

Our Process

Every project is different, but our approach remains consistent - clear planning, reliable preparation and dependable delivery from start to finish.

Built around Flexibility
We understand that live productions often involve changing schedules, evolving requirements and tight turnaround times. Our process is designed to remain flexible while maintaining reliable delivery throughout every stage of the project.

Our Work

DMS has supported a wide range of live events, conferences and agency-led productions across the UK and Europe.

From leadership events and corporate conferences through to multi-space productions and technical dry hire support, we work behind the scenes to help deliver reliable and professional event experiences.
